

# Mounting system for your «glass composition» Type

## B

**Congratulations with your just required unique glass object. Please read text and explanation below for a smooth mounting in order to enjoy for many years your new color-composition .Please maintain only with a moisturized cloth and use no aggressive detergent .**

in case of any questions mail to: [pvstudio@hetnet.nl](mailto:pvstudio@hetnet.nl)

We recommend to place a blanket or other soft material on the ground to place the object on during the installation. Also leave the protection corners on until final hanging is achieved.

Required tools:

measurer, spirit-level, 6 mm stone drill bit, drilling machine and a Phillips-head screwdriver.

**Attention: Type of wall:** a. Stone- or concrete walls: Use supplied fixing materials.

b. Plasterboard walls: Require additional special fixing plugs («Driva or Fischer») to fit the supplied screw sizes/dimensions.

c. Ytong or Gypsum walls: Use metal drill bits instead of stone bits, attach with the supplied plugs and screws.

d. Wooden walls: Use supplied screws for fixing without plugs.

**Please check if there are no water, gas or electricity pipes in the selected drill- positions.**

**A** Mark position on wall, to avoid damages: leave corner protectors on.

**D** Position and mark drill positions for top end as indicated. Find X by inserting hooks into mounting plates on Object and measure the centers.

**B** You can also measure your object and mark corners directly onto the wall.

**E** Drill 6 mm holes -35 mm deep- and fix mounting plates (with washer on the outside) with plugs and screws.

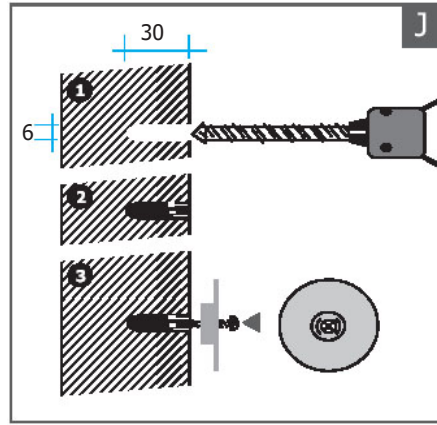

**C** Make sure potential top line of your object is leveled.

**F** Check if leveled ,otherwise adjust one.

**G** Mark position of bottom-end on wall, to avoid damages leave cornerprotectors on.

**J** Drill 6 mm hole 30 mm deep and fix with plugs and screws with small round button facing the wall.

**H** Before you take off Object from wall check if leveled otherwise adjust (see F.)

**K** Remove protecting paper and aline button.

**I** Mark drill Position for bottom fixing as indicated.

**L** Hang object and push firmly at bottom end to attach bottom fixings to your object.

In case you would like to remove or replace: Pull at the bottom end to release the fixing buttons and lift object to unhook at the top.

The round but-tions at bottom end will stay on the wall and the square plates will sit on the object. At re-installing just hang in and click bottom end into buttons.

Also please be aware this is a unique piece all hand-cut and made so slight imperfections just indicate you have a genuine artifact at hand.
